## **DeskAlerts - Desktop Alert Software**

Address Contact Person Mobile Number Email

{value\_address} {value\_contact\_person} {value\_mobile\_number} {value\_email}

DeskAlerts - desktop alert software is the easiest way to provide your customers with your news and alerts. This is a small software sits in customer Windows taskbar and pops up window every time you send broadcast message. You even can send personalized messages. This is more effective than e-mail or RSS. Your message will be delivered with 100% guarantee. No spam filters, no obsolete addresses. Your customers don't need to know what RSS is and what to do with it. They need to download small application only.
