DevSolutionsCrypt library is a powerful and easy to use cryptographic ActiveX and DLL component for Windows developers that allows applications to encrypt/decrypt data or files using the latest industry standard strong encryption algorithms.It can be used to encrypt/decrypt strings,memory buffers,Blobs,Files and streaming data. For strong symmetric encryption algorithm,it supports the new Rijndael Algorithm , which is a Federal Information Processing Standard (FIPS) approved Advanced Encryption Standard (AES) .It also supports Serpent, Mars, Triple DES,Blowfish algorithms. DevSolutionsCrypt component is designed to guard your client's or application's sensitive information with powerful byte/binary encryption algorithms.You can use it to secure your sensitive information such as passwords and credit card numbers when storing them in a databas
