<b>Email</b>	{value_email}

dhtmlxGantt - a JavaScript component that allows you to create dynamic Gantt chart and visualize a project schedule in a convenient graphical way. With dhtmlxGantt you can display dependency relationships between activities, show current schedule status with percent-complete shadings and organize the activities into a tree structure. The component works in all major web-browsers, including IE, Mozilla, Opera, Chrome. You can initialize the chart from XML or through JavaScript API. All the changes made in the chart structure in browser can be saved back to the server on the fly (in XML form) with a single function call.
