

dhtmlxTabbar - Ajax-Enabled JavaScript Tabs

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Cross-browser, XML driven, and fully customizable JavaScript tabbar that provides an easy-to use solution for building intuitive tabbed interfaces. You can place different content within tab pages. Tabs can be top, bottom, right, and left oriented. The tab content can be displayed in iFrames or dynamically loaded on demand with Ajax. The tab control supports multiline, scrollable, and nested tabs, and allows easy initialization through simple HTML.
