<b>Email</b>	{value_email}

Dieselpoint Search is a guided search and navigation solution. It helps users navigate through data sets in an intuitive way by taking advantage of the data's underlying structure. Customers are currently using it to guide users to the best items in product catalogs, the best documents in document collections, and the best pages on websites and intranets. It presents highly relevant, tailored results in a way not possible for traditional search engines or SQL databases. Scalable to millions of items and hundreds of searches per second, it powers some of the top sites on the web. Supports 40 languages. Written entirely in Java.
