DIP Update

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This free Dynamic IP Direct script automates the process of updating an ever-changing IP address. Dial-up; even Home DSL and Cable connections can change your IP address without warning, unless you pay big-bucks for a static IP. This script reports your IP to any subdomain site like CJB.net, and saves your real IP to a text file on the server. Dial-up; even Home DSL and Cable connections can change your IP address without warning, unless you pay big-bucks for a static IP. This script reports your IP to any subdomain site like CJB.net, and saves your real IP to a text file on the server. Have multiple domains? No problem. This script will sequentially report to the domains when your IP address changes, so no matter how your web visitors find your site, you can rest assured they'll get there without any problems. Check it out! It's easy to set up and install and BEST OF ALL, It's free!
