

dirLIST - PHP Directory Lister

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

dirLIST displays files and folders in a given HTTP/FTP directory. It has a wonderful interface with choice of Thumbnail or List view along with gorgeous icons for different file types. Includes a sleek gallery, web based mp3 player, file admin + more. Very simple to setup! Some of dirLIST's key features: - List all the files and folders in a given HTTP or FTP directory - Image gallery for viewing image files - Media player for playing MP3 files in your browser - Thumbnail or classic list view of files and folders - Admin feature to enable file and folder deletion and renaming - 4 interface languages; English, French, German and Spanish - File icons - Force download speed limit - File uploads (file type banning and auto file rename) - Show the sizes of folders and files - Sort content based on name, size or upload date (users can choose aswell) - Ability to hide certain files and folders (and specific extensions) - User customizable
