

# Display All Form Variables and Names Posted

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The following ASP code will allow you to Count through all form field names and values posted to this script. It can be easily adapted to make simple feedback form mailers, where this code allows any new forms fields to be automatically picked up and included in the post.
