Display an Excel DB

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The author writes "For small data bits on a server where the chance for significant simultaneous traffic is not likely excel can perform many of the basic tasks that can be accomplished in Access or SQL Server, but on a much smaller scale." This exmaple code demonstrates how to display data from Excel using sample data of Hank Greenberg's career statistics. Example code available for download.
