

Displaying an Image from an XML Element

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This sample was generated in response to a question that was asked of me from my website. I thought that I would share it with the rest of the world. The question was: "I have been trying (without any luck) to create an XSL file that will create an HTML page that shows the picture (the location is in the tag). Do you have any ideas?"
