<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

DMailWeb is a web-email gateway which allows you to read and process your new email from a web browser running on any machine with access to the internet or your intranet. It provides facilities to read new mail, send and forward messages, send and view attachments, etc. You can also delete the new messages once you have processed them or leave them on the server for later downloading with a normal email client package.
