

Domain Shop Script (DSS)

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

DSS is a script based on PHP and MySQL which allows for the listing and sale of domain names, a growing commodity on the internet and beyond. Although DSS is meant for advanced users and resellers, it can also be used by those who only have a few domains to sell. DSS is easy to use, completely customizable, and gives customers an easy and interactive interface to work with. Features of DomainShopScript: - Complete control of all domain-related tasks within one consolidated administrative panel. -Ability to group domains by category. -Search ability available to users. -'Contact Us' script built in. -Ability to receive offers, as well as accept them, reject them, or counter them. -Ability to allow purchases for a set price. -Full domain details available on domain information page. -Completely customizable user interface. -Ability to store user information and utilize a username and password. And lots more!
