DotNetOpenMail

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

DotNetOpenMail is an open-source library which can be used to create multipart/alternative and multipart/related email in .Net or Mono. It is pure C# and does not depend on CDONTS, and it can be used as a replacement for System.Web.Mail. DotNetOpenMail also supports binary attachments and sending in any .net-supported character set.
