

DownloadAssistant

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This program will call your selected download file create a download database and automatically send admin an email if variable (1) is set in script variables. That's it. All with just one click. You might want to create a link to the downloads.db file (like this) created and stored in the /cgi-bin/downloads_assistant/ folder. This script is designed for the user's speed and convenience for obtaining their download—just one mouse click.
