

Drag and Drop Initiates Action Effect

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

In this Flash tutorial you will first create a symbol (object) that you can drag and drop around the screen. Next you will create a drop zone area that will cause the symbol (object) to react when it is dropped into the target area by performing a hit test. As always the completed source file is included.
