

## **Drag and Drop Initiates Action Effect**

Address {value\_address}

Contact Person{value\_contact\_person}Mobile Number{value\_mobile\_number}

**Email** {value\_email}

In this Flash tutorial you will first create a symbol (object) that you can drag and drop around the screen. Next you will create a drop zone area that will cause the symbol (object) to react when it is dropped into the target area by performing a hit test. As always the completed source file is included.
