

Drop down theme/template selector in PHP/MySQL

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This tutorial will teach you how to make your site have the option to allow the users to choose the look and feel of the site using PHP, and MySQL wrapped around a HTML template. Doing this gives you more control of your site without having to recode all your HTML inside your PHP scripts.
