

# DropDown Menus That Do PopUps

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

A simple script that allows you to launch popup windows from a dropdown menu. Any number of links can be added to the options list. The popup window features can be set within the script. Great for saving space on the page when long lists are required, for image popups, and for offsite referrals while still keeping people on your page.
