Dynamic Authentication Filter (DAF)

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

DAF is a complete package to handle Web user authentication on an NT/IIS server. It include: an ISAPI filter (DAF) which handles authentication for all HTTP requests received by IIS, an ASP application (Web User Manager) to manage users in any DAF databases through a Web interface, and an ASP component (DAFTools) to easily manage DAF users in ASP scripts.
