

# Dynamic Javascript Includes

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Dynamically include javascript files in your page. Simply place all your javascripts in a sub directory and make one reference in your page to the cs\_scripts.asp file. You can then pass + or - with file names to either include or ignore a file in the sub directory. By default all are included.
