

Dynamic Sitemap

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Dynamic Sitemap is a tool for dynamic generation of website sitemaps and robots.txt files. It runs through the entire site from the URL entered by the user (it is recommended to enter the home page's URL), moving from link to link within the web pages, adding to the Sitemap those that are reachable. This tool is distributed as an extension for Adobe Dreamweaver.
