E-Postcard Address Book

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Integrates seamlessly with any postcard script to give users their very own secure personal address book accessible with the click of a button from your postcard composition page. Users can create their address book by entering a few pieces of info and then can log in at any time to manage contacts and even automatically insert contact info and their own info directly into your postcard forms. Script can remember login info and automatically email users forgotten passwords by request. Includes an attractive graphical interface with several color schemes available. New version allows users to select multiple contacts from their address book and insert all info into postcard forms if your postcard script supports mutiple recipients.
