e107 is a website system written in PHP and mySQL. It installs a completely dynamic website on your server allowing you to create a interactive website with news and forums, which can all be edited via the secure administration backend. Plugins included with the install are chatbox, poll system, forum, RSS Feeds, headline retrieval, more are included and are ready to download on e107Coders.org. e107 is completely themable and the only limitation is your imagination. 13 themes are included with more to download at the many theme sites around. PHP 4.1+ is required, the system self installs after asking you a few simple questions and testing your server for compatibility. Code is XHTML Strict compliant, however third party themes/plugins may not be valid. Realtime support available in IRC channel #e107 on freenode.net. Also the support team are active in the forums on e107.org.
