

Earn-It Manager

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

If you are giving away for free or selling something online then you need this script. It can allow you to offer anything to your visitors if they send you the amount of unique visitors you specify. People love getting anything for free so why not turn their love for freebies into traffic? It will at least quadruple your current traffic. How does it work? Your visitors signup by filling out a short form and receive a banner link with their ID. They place that banner anywhere they want. Once they reach the amount of unique visitors you specify you will receive a report. Features Include: Easy to install and to use; Full control of confirmation email to the participants; Send notifications with emails, usernames and passwords to the admin; Advance checking for duplicate visitors- it will count only unique visitors; Participants can see realtime statistics. Earn-It Manager is very easy to configure. If you are worried that this is too difficult for you to use, don't worry....this program gives you step by step instructions on how to use it. It's as easy as 1,2,3. Write your confirmation message to the participants, Upload your banner image, Configure the Perl script, and everything is set.
