Mobile Number	{value_mobile_number}
Email	{value_email}

Easy Basket is a very original shopping cart application which enables us to sell items inside any web page without any big code/structure updates. Once installed, the products and basket can be inserted into any part your web page where they will start functioning instantly. When an item is added to the basket, a sliding + Ajaxed basket can appear to show the total price and display the checkout options. Also, you can drag 'n' drop a product into the shopping cart as well.
