Easy File Manager v2.1.1 is a package for advanced files and folders managing on you site. This script will help you to organize your own file directory. If you need users to upload their files on your server in their own or shared folders - this package is for you. It's a CGI script that will perform most of the file operations required for web site maintenance. You can create unlimited user accounts to access your file directory and quickly manage them. Using this File Manager script you can share you server disc space with your clients and define their possible actions.
