EasyDynamicPages could be a Web Portal System, news system, personal or business site. The goal is to have an automated web site not only to distribute news and items but also easily to create and edit dynamic web pages (DynamicPages) without knowledge of html, php or whether you need to develop websites. Each user can submit news, comments, discuss articles and more. Registered users and administrators can additionally create and modify DynamicPages. Plugins included with the install are BookMarks manager, E-Calendar, E-Publish, E-card and E-gallery systems and Yahoo-like E-Classifier system. Features: design/content separation, web admin, user-customizable theme management, SiteConfig manager, PageEdit manager, Search engine, Left/Right blocks system, editor to add news and for content management, modular DynamicPages structure, system self-install and more. Written in PHP, works on windows, unix, linux and requires PHP, Apache and MySQL.
