

# EasyIndex

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This script does many things to assist you in getting your site indexed on the major Search Engines. EasyIndex assigns a unique subdomain to your existing domain name giving you a higher degree of anonymity and less chance of being banned by the Search Engines. This requires that the admin on your server assign a \* A 213.213.213.213 wildcard to your domain, which is standard on most web servers now anyways.
