| **Email** | {value_email} |

eazyPortal is the best solution allowing you to maintain your online community. It has been designed with the latest technologies using smarty, CSS/XHTML. It is administration friendly, easy to install and with a live support. Various content types are supported by it: own forum, custom pages, news, polls, downloads, mailing list, RSS feeds and contact page (a list of all features can be found on our website), as well as templates and language files. Portal is created in PHP, it uses mySQL database. Create your own online community in just a few easy steps, without any difficulties!
