ElegantJ Chart Designer provides ultimate interoperability through XML integration, and with easy-to-use intuitive Chart Designer IDE, you can design customized, dynamic, interactive 2D and 3D charts in less than 5 minutes! Enjoy the liberty of working in different Java architecture - Java Enterprise Edition, JSP, Servlet, and Java Standard Edition. It works with any latest IDE - Borland JBuilder, Sun Java Studio Creator, NetBeans or Eclipse Editor. ElegantJ Charts provides more than 50 types and subtypes of charting components (bar charts, line charts, area charts, pie charts to name a few) to provide the right visual representation of your data through intuitive charts. Mouse properties have been enhanced to give you effortless understanding with MouseEvent listener support for individual view objects. Provides various display formats to show formatted data on a graph with n-level Drill-Down in charts for visual mining.
