

ElegantJ Printer: Java Bean Collection

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

ElegantJ Printer bean integrates full printing functionality in Java application. The ElegantJ Printer provides control on spool size and facilitates background printing. It provides header and footer configuration along with page setup. ElegantJ Printer is ideal selection for any Java™ component without in-built printing functionality. ElegantJ Printer is ideal for TextArea, JTextArea, JTextPane and JTable type of Java swing components. ElegantJ Printer allows you to set spaces after the header and before the footer. A complete page setup dialog box lets you set page margins, fix header/footer size, select portrait or landscape page orientation and define paper type and paper size.
