Email Spider Stumper v 3.1

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

If you have a contact page with multiple email addresses listed and are tired of having the email collection spiders grab your email and SPAM you until you are ready to scream, this is the solution for you. This script allows you to place multiple email addresses on a single page without them being detectable by the harvesters. We don't claim it is bullet-proof, only that we have not been able to find a way around this script. New Version with new features!
