

Email Templates Manager for Magento

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Most default e-mails sent from your Magento store go directly to clients' SPAM folder. That happens because of Magento templates' improper encoding, lack of plain-text version, and incorrect use of html tags. This extension fixes these problems. It helps your e-mails to get past spam-filters straight to your customers' inboxes. It also enables you to easily manage e-mail templates. Full list of features is available on the product page. The extension comes in 2 versions: CE-compatible and EE-compatible and includes an Advanced Language Pack added with the following languages: - German - French - Spanish - Italian - Dutch
