Mobile Number	{value_mobile_number}
Email	{value_email}

EnBPro is a highly portable Perl-Tk gui FTP client that will work under a variety of operating systems, as well as over PPP, PPPoE, and Ethernet connections. Current functionality include: Upload, Download, Delete files, Make directory, Remove directory, Switch between ascii and binary transfer modes, Change Directory, and CDup (Move to parent directory). It includes a readme file with details and cursory instructions on use of the program. EnBPro requires: Perl 5, Tk modules for Perl, and Net::FTP for Perl.
