Don't spend over \$100 on an encryption utility. This COM-accessible full-featured encryption library supports all of the .NET encryption types because it's made in .NET. Use it from: ASP, VB 6, VC++, Visual FoxPro, C#, VB.NET, and any other language that supports COM or .NET. Supported encryption types include: DES, 3DES, RC2, Rijndael (AES), RSA and DSA. Features also include: CSP private key storage and retrieval, support for PKCS #12, DER encoded binary X.509 certificates, and more. Purchase includes unlimited internal developer use, royalty-free distribution, complete MSDN-style API documentation, and basic sample code for encryption in ASP, VB6, C#, and VB.NET. Free to try with a 10 second delay on all encryption and decryption calls.
