Enterprise Portal is a Web Portal system that delivers easy-to-navigate canned information. Additionally the Enterprise Portal empowers employees to publish and share new information and their existing knowledge quickly and easily. Main features include: the construction of a company-wide directory of information, documents and files - independent of format, Documents are not managed by encrypted file names, rather they contain meaningful descriptions and short abstracts of content, Every user receives an overview of new or updated information automatically, Information is found quickly through the use of a full-text search, New documents and information can be published in an intranet without use of HTML, and Every user has a personal Home-Page which can be put together according to individual information needs.
