

Epoch DHTML Javascript Calendar

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The Epoch DHTML JavaScript Calendar allows the web developer to quickly upgrade their users' web experience without spending hours developing complex date-validation scripts. Constructed entirely in Javascript and styled with easily-customizable CSS, Epoch is a powerful facet of any advanced website. Epoch is developed entirely using Object-Oriented Programming, making it exceedingly simple to integrate Epoch into your current framework. Epoch is W3C Standards-Compliant and runs on all major browsers, including Microsoft Internet Explorer, Mozilla, FireFox, Netscape Navigator, Opera, and more. Features: Fast loading and initialization; Intuitive, customizable interface; Can display as a Flat or DatePicker calendar; Automatic Date Formatting-US, European, or create your own; Multiple-Date selection/MultiSelect; Full Object-Oriented Design; CSS Styling. Now available in English, Français, Español, Deutsch, Italiano, Nederlandse, Russian, Chinese, Polish, and more languages!
