

eUpload

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script allows for people using browsers that are RFC1867 compliant to upload files directly through their web browser to your server. Administrators can configure for each users where file will be uploaded. This script is ideal for administrator's who want to allow users to upload files, but don't want add a FTP account.
