nsEventHandler_Basic: Free Version (Source Code Not Included) This is a fully functional release of our Event Handler Pro, but without the source code or support. However, for those just wanting to plug in an event handler and go, it's perfect for your needs! Whether you are using C Sharp (C#) or Visual Basic.NET (VB.NET), you will be able to import this .DLL into your project, reference, and you are ready to prepare and send your areas from anywhere in your application. Exception Handling, Event Monitoring, or Error Reporting has never been easier! System Requirements: ASP.NET (Framework Version 1.1) Microsoft Windows Internet Information Services (IIS) Microsoft Visual Studio or ASP.NET authoring software. This program is excellent for shared environments to help standardize your code. With Event Handler Pro, you can send your error messages to: The Windows Event Viewer A Log File A SQL Server or MSDE database E-mail address or distribution list.
