eWebLog Analyzer is a web server log analyzer, that gives you vital information about your website usage: access statistics, activity of visitors, referring sites, search engines, errors, and much more. It can read log files of the most popular web servers, including Microsoft IIS, Apache, NCSA, and any other web server that can be configured to produce log files in Common or Combined standard format, or W3C Extended format. eWebLog Analyzer support gz and zip compressed logs, and can also download your log files from FTP or HTTP servers. Reports generated by eWebLog Analyzer present data in clear, easy to read tables and colorful 2D/3D graphs. You can show reports in the integrated viewer, and export customizable reports in HTML, Microsoft Word, CSV and XML formats.
