This win-cgi script allow to read/open the any MS Excel files on server side and return the html-converted contents (to client browser). The script don't use any external libraries (no MS Excel/Office, no BDE, no ODBC, no ADO etc) and you may run this tool on computer without any additional setup/install. Very fast and don't eat a lot of server resources. All MS Excel files supported (spreadsheets, workbooks etc) with automatical unicode conversion. Only MS Windows platform for web-server supported
