

Expandable Content by flooble.com

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This free script will let you create highly customizable expandable/collapsible boxes to save space on your page. When a box is collapsed, only its title is shown. The user clicks [+] in the corner to expand it, and view the content. Then, clicks [-] to collapse it back. You have total control over the look and content of the boxes. Save space on your page without cutting down on the content.
