

# exportDb

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This class can be used to create a backup of a MySQL database using the mysqldump command. It invokes the mysqldump command to generate a backup file of a given database on behalf of a given authenticated MySQL database user. The generated backup file is copied to another file with the name based on the current date.
