Extended Search

Address   {value_address}

Contact Person   {value_contact_person}

Mobile Number   {value_mobile_number}

Email   {value_email}

Extended Search Magento extension greatly improves Magento search results. This extension finds exactly what your customers look for. It runs its own search algorithm, based on products' "weights", which are being calculated dynamically for every search query. Ability to define a priority for every product's attribute allows you to correct search results by changing the way how a search "weight" for products is calculated. Moreover, Extended Search allows displaying any products' attributes near the search field so that your customers will be able to select what attribute they want to use for their search and narrow the found results. All this makes your search results incredibly relevant
