EZ Skype

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

EZ Skype is a Mambo/Joomla! module which adds Skype functionality to your web site. It comes in 2 flavours - a standard module with 10 different Skype images to choose from (depending on site template design), and the only other option you need to set is your Skype user name. Also available is a multi-choice module, which comes with just one image design - but it's setup as a drop-down selector. Site visitors will have a number of Skype contact options with this module. EZ Skype has also been translated into a number of different languages - and installation is easy via the Mambo/Joomla! module installer.
