We feel EzBan is one of the most complete and easy to use banner rotation systems available anywhere! Designed for real-life use... Not filled with so many features and hard to use functions, that no one ever figures out how to use it... After all, what good is a banner rotation system if no one can use it... Or use it correctly and easily anyway! EzBan was designed to be used by a normal user, not by the IT Department. Add, Modify, Delete, statistics, MySQL Backup Function, static or auto-rotation modes... And more!
