

EZNewsletter

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

EZNewsletter is in Version 4 and has been completely rewritten. Aside from a new look and feel it is now mobile friendly. You can now compose and send a newsletter from your phone! As always this app is double opt-in. If you have ASPUpload installed on your server then you can upload images for use in the newsletter and it now uses an MSSQL Database. Create Templates, you can create and edit multiple templates! You can add more admins and assign them rights! This script is totally customizable...totally EZ!
