

EZsite WebNotes

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

With EZsite WebNotes you can quickly post information to a selected area of any web page. Just place a server-side component (no client-side ActiveX, VBscript, Java, or Javascript) on your web page, use the WebNote Manager through your own browser to enter a note, and it's posted immediately. Although WebNotes is easy enough to allow novice users to edit web site data without knowing HTML or FTP, advanced users can still utilize HTML within any note. New multi-user password system allows independent sites to be controlled by different users.
