Frequently Asked Questions is one of the most popular elements of a web site and these pages are being updated frequently. FAQ Manager makes this job easy. Using the password protected admin page, you can add/modify/delete questions and answers. You can also change the order of the questions. FAQ Manager also supports more than one FAQs in your site. The design of the FAQ is highly customizable. Using tags, the script knows where to place the FAQ texts and does not conflict with your design or other elements. The installation should not take more than 5 minutes or your time.
