

# FastBanner

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

A simple banner generator using PHP and GD. It's very easy to modify. You just fill out the form and click submit and it makes the banner. Requires: PHP (It should work with any version on any platform. It seems to work faster on Apache.) The GD library with png support installed. Development has stopped. However it is still available for download.
